

Do you know...?

6 reasons why people don't invest towards their retirement

"I don't have enough"

If you cannot live comfortably today, what about retirement when you could be living on less than 60% of your basic salary?

"I already contribute to SSNIT"

Although your SSNIT contributions can help, they are often less than you need to enjoy your dream retirement.

"I'll do it later"

It is never too early to start planning for retirement but it can become too late and more expensive if you keep postponing.

"I don't plan to retire"

Even though you wish to work after retirement, a decline in your physical and mental faculties may not allow you to.

"There are more pressing needs today"

Planning for the future is as important as taking care of today's needs because retirement can catch up with you sooner than you expect.

"I don't know how"

You don't need to face your retirement alone; an investment advisor can help you plan for your retirement.

A comfortable retirement will not happen by chance. Let's help you prepare for your retirement today. Retirement planning is easy with Databank. Let's face it together!
